SUMMARY

Software Engineer, AI Agents with 5+ years of experience designing and developing **AI agents and multi-agent systems** using **Amazon Bedrock, Azure AI Foundry, LangChain, Autogen, and Semantic Kernel**, building **agent-driven workflows** to automate enterprise processes and orchestrate tasks across distributed systems. Proficient in developing **RAG-based and conversational AI solutions**, integrating **LLMs, REST APIs, enterprise data sources, and external services** into agent architectures, and implementing **scalable cloud-native applications** using **microservices and serverless patterns on AWS and Azure**. Experienced building reusable agent frameworks, SDK integrations, and automation pipelines, ensuring **secure, compliant, and responsible AI implementations** with governance, explainability, and monitoring, and contributing to **CI/CD pipelines and production deployment of AI solutions** with Docker and Kubernetes. Passionate about **optimizing agent performance, latency, and cost** – translating business requirements into intelligent, autonomous AI systems that **drive enterprise transformation at scale**.

EXPERIENCE

Accenture

Nov. 2024 – Dec. 2025

Software Engineer, AI Agents

Buffalo, NY, USA

Project: Agentic Medical Diagnosis System

- Designed and developed **AI agents and multi-agent systems** using **Amazon Bedrock, Azure AI Foundry, LangChain, Autogen, and Semantic Kernel**, building **agent-driven workflows** to automate enterprise processes and orchestrate tasks across systems serving **10,000+ daily agent executions** at 99.9% reliability.
- Built **RAG-based and conversational AI solutions** using modern GenAI frameworks, integrated **LLMs, REST APIs, enterprise data sources, and external services** into agent architectures, and developed **multi-agent orchestration and workflow design patterns** for complex autonomous task execution.
- Implemented **scalable cloud-native applications using microservices and serverless patterns** on AWS Lambda, Azure Functions, and Service Bus, applied **event-driven architectures**, and built **reusable agent frameworks, SDK integrations, and automation pipelines** for agent deployment at enterprise scale.
- Ensured **secure, compliant, and responsible AI implementations** with governance, explainability, and monitoring, applied strong **Python programming expertise** for all agent development, and optimized **agent performance, latency, and cost** across AWS and Azure cloud environments.
- Collaborated with **architects and domain teams** to translate business requirements into AI-driven solutions, built **GenAI-enabled user interfaces using React**, and demonstrated experience with **agent-to-agent communication and orchestration protocols** across distributed enterprise systems.
- Contributed to **CI/CD pipelines, testing, and production deployment** of AI agent solutions using GitHub Actions and Azure DevOps, applied **Docker and Kubernetes containerization**, and integrated **enterprise systems including APIs, databases, and SaaS platforms** into agent workflows.
- Demonstrated **exposure to AI governance, safety, and responsible AI practices**, applied **AWS and Azure cloud certifications expertise**, and delivered **12 major AI agent platform features** on schedule with strong cross-functional collaboration.

Pandora Finance

Jan. 2022 – Aug. 2024

AI Engineer, Cloud & Agents

India

Project: Apex Protocol

- Designed and deployed **AI agents and multi-agent systems** using **Amazon Bedrock, LangChain, and Autogen** for a DeFi financial platform, building **agent-driven automation workflows** processing **50,000+ daily enterprise tasks** with **99.5% availability**.
- Built **RAG-based AI solutions and conversational agents**, integrated **LLMs, REST APIs, and enterprise data sources**, implemented **microservices and serverless patterns** on AWS Lambda and Azure Functions with **Service Bus event-driven architectures**.
- Developed **reusable agent frameworks and automation pipelines**, applied strong **Python and Java programming expertise**, ensured **AI governance and responsible AI practices**, and optimized **agent performance and cost** across AWS and Azure cloud environments.
- Built **GenAI-enabled React user interfaces**, contributed to **CI/CD pipelines and Docker/Kubernetes de-**

ployments, and integrated enterprise APIs, databases, and SaaS platforms into production AI agent architectures with strong fintech domain expertise.

- Demonstrated experience with multi-agent orchestration protocols, Semantic Kernel, and Azure AI Foundry, applied agent-to-agent communication patterns, and delivered 8 major AI agent features with strong security, compliance, and monitoring standards.

Logicprog Technologies

Jan. 2021 – Dec. 2021

Full Stack Developer – Backend Focused

India

Project: Serverless and Scalability

- Built AI agent workflows using LangChain and Amazon Bedrock, developed RAG-based solutions integrating LLMs and enterprise data sources, implemented cloud-native microservices and serverless patterns on AWS Lambda and Azure Functions across 12 production AI projects.
- Applied strong Python and REST API development, built event-driven architectures with AWS SQS/SNS and Azure Service Bus, leveraged Docker and Kubernetes, and contributed to CI/CD pipelines and production AI agent deployment.
- Developed reusable agent SDK integrations and automation pipelines, applied AI governance and responsible AI practices, integrated enterprise APIs, databases, and SaaS platforms, and maintained zero critical production AI agent incidents throughout.
- Built GenAI-enabled React interfaces, demonstrated strong multi-agent orchestration expertise, applied agent-to-agent communication patterns, and consistently delivered secure, compliant, production-grade AI agent solutions on schedule.
- Optimized agent performance, latency, and cloud costs across AWS and Azure, demonstrated strong prompt engineering and LLM integration expertise, and consistently contributed reliable, scalable AI agent infrastructure meeting all enterprise delivery standards.

TECHNICAL SKILLS

AI Agent Frameworks:	LangChain (Expert), Autogen, Semantic Kernel, LangGraph, Google ADK, MCP
Cloud AI Platforms:	Amazon Bedrock (Expert), Azure AI Foundry, Azure OpenAI, GCP Vertex AI
LLM & RAG:	RAG Architectures, Prompt Engineering, Multi-Agent Orchestration, Vector Databases
Languages:	Python (Expert), Java, TypeScript, JavaScript, SQL
Cloud & Serverless:	AWS Lambda/Bedrock, Azure Functions/Service Bus, Docker, Kubernetes, Microservices
APIs & Integration:	REST APIs, Event-Driven Architecture, Enterprise System Integration, SaaS Platforms
Frontend & DevOps:	React, GitHub Actions, Azure DevOps, CI/CD Pipelines, GenAI UI Development
AI Governance:	Responsible AI, AI Safety & Explainability, Monitoring, Compliance, Agent Optimization

PROJECTS

Agentic Medical Diagnosis System | GitHub

- Built multi-agent systems using Amazon Bedrock, LangChain, Autogen, and Semantic Kernel, developed RAG-based conversational AI solutions, implemented serverless microservices on AWS and Azure, applied AI governance and responsible AI practices, and deployed via CI/CD with Docker/Kubernetes achieving 99.9% availability.
- Developed reusable agent SDK frameworks and automation pipelines, built GenAI-enabled React interfaces, integrated enterprise APIs and data sources, applied agent-to-agent orchestration protocols, and optimized agent performance and cloud cost on schedule.

RAG-Driven Climate Aware GPS Navigator | GitHub

- Designed RAG-based AI agent workflows using LangChain and Amazon Bedrock, built multi-agent orchestration with LangGraph and Autogen, implemented event-driven cloud-native microservices on AWS Lambda and Azure Functions, and applied prompt engineering and LLM optimization achieving sub-100ms agent response times.
- Applied Azure AI Foundry and Semantic Kernel for agent development, built CI/CD pipelines with Docker and Kubernetes, integrated enterprise data sources and SaaS APIs, and consistently delivered secure, com-

pliant, production-grade AI agent solutions on schedule.

EDUCATION

University at Buffalo, SUNY	Buffalo, NY, USA
Master of Science in Data Science and Applications	Aug. 2024 – Dec. 2025
Vellore Institute of Technology	Vellore, TN, India
Bachelor of Technology in Computer Science and Engineering	Jul. 2018 – Jun. 2021
